# Press Release

## AQUANAUTS GRENADA NOW SDI / TDI TRAININGS FACILITY

With its affiliation to SDI and TDI Aquanauts Grenada now can provide a wider variety of courses, extending instructions into technical diving.

Grenada, February 20. 2003: **Aquanauts Grenada proudly announces the new course possibilities through SCUBA DIVING INTERNATIONAL- SDI and TECHNICAL DIVING INTERNATIONAL - TDI. With the new affiliations Aquanauts Grenada now has the ability to teach specialty courses like Deep Diver, Wreck Diver, Wreck Diver, Solo Diver and a variety of different levels of Enriched air nitrox courses. The deep diver course provides students with necessary training to plan and execute dives that are beyond 60 feet / 18 meters and to a maximum depth of 130 feet / 40 meters. As a wreck can be one of the most exiting dive sights to visit, the wreck diver course teaches participants safe practices and penetration skills. A solo diver course is a must for photographers, instructing on proper procedures to dive solo and safe. The scale of EANitrox courses starts with basic SDI computer nitrox course, a TDI basic course deals with mixes up to 40% and the advanced nitrox diver course examines the use of EAN 21 through 100% for optional mixes to a depth of 130 feet / 40 metres for dives.**

**Besides the new opportunities into technical diving; SDI also offers the possibility of UNIVERSAL REFERRAL procedures, whereas students of all affiliations may complete their open water certification dives in the warm waters of Grenada and receive the certificate of their choice at the home dive shop.**

**Aquanauts is also a PADI 5Star Gold Palm Resort.**
