Press Release

NITROX

FREE NITROX @ AQUANAUTS GRENADA!

As of January 2007 Aquanauts Grenada offers free Nitrox to divers!

Grenada, January 17, 2007:

Acting on the high demand and request of its divers the team of Aquanauts Grenada decided to offer Nitrox for FREE to guests. To dive Nitrox is highly recommended on Grenada's dive sites – on Wrecks like to Bianca C or King Mitch you enjoy more bottom time and safety. For repetitive dives Nitrox diving avoids the accumulation of Nitrogen in the body, so even after several dives a day you don't feel tired or exhausted.

For those not yet Nitrox certified, Aquanauts teaching team offers several different courses to gain this certification. Divers may choose between the PADI Enriched Air course, the SDI Easy Computer Nitrox Course or the TDI Basic and Advanced Nitrox Course.

Nitrox house mix 30% tanks are free with all regular packages booked, for special offers and other gas mixes a surcharge may apply.

To book your dive vacation please contact your travel agent or tour operator, visit our web page or call our reservation office:
